EDUCATION

New York University, Abu Dhabi

Bachelor of Science in Computer Science, Minor in Interactive Media.

Abu Dhabi, UAE

Aug. 2023 – May 2027

Relevant Courses: Computer Programming for Engineers (C++, C#, MATLAB), Data Structures and Algorithms, Computer Networks, Operating Systems, Software Engineering, Database Systems, Calculus I, II.

EXPERIENCE

AI Research and Strategy Intern

Black Tech Street

Sept. 2025 – Present

Tulsa, OK, USA

- Conduct AI-economy and resilience research with the G-ACE/MIT team, producing analytical briefs and structured summaries that inform community-scale AI deployment
- Support the design of AI literacy and workforce development initiatives in collaboration with **Microsoft** and **NVIDIA**, providing research inputs for curriculum planning and early-stage model development
- Analyze stakeholder feedback and AI adoption barriers; translate findings into recommendations that strengthen Black Tech Street's efforts to build an inclusive AI ecosystem in Greenwood

Research Assistant

RNA-MIND Lab, NYU Abu Dhabi

Aug. 2024 – May 2025

Abu Dhabi, UAE

- Designed and deployed a responsive website using **WordPress, HTML, CSS, and JavaScript**, simplifying access to lab research and increasing traffic by **30%**
- Automated **Python**-based data analysis pipelines to reduce processing time by **20%** and improve reproducibility
- Streamlined content scheduling using lightweight automation to improve audience reach and reduce manual updates

IT Intern

Young Achievers Foundation Ghana

June 2025 – Aug. 2025

Kumasi, Ghana

- Enhanced the foundation's website using HTML, CSS, and JavaScript, improving navigation and increasing engagement by **20%**
- Developed lightweight IT tools and data-organization workflows that supported program operations and reduced manual workload
- Assisted with introductory programming sessions, reinforcing core computing concepts and contributing to early STEM and AI literacy efforts

PROJECTS

Fire Emergency Simulation | *Unity Game Engine, C#, Oculus VR*

[GitHub Link](#)

- Built an immersive VR fire emergency simulation in **Unity** using **C#** and Oculus SDK, enabling a realistic first-person training environment
- Implemented **custom pathfinding** and interactive event systems (calling 911, extinguisher use) to model user behavior and emergency response flows
- Created and hosted a project website with an embedded demo video to communicate the simulation's goals, design, and training applications

Reliable Transfer System | *Python, UDP, ARQ Protocols*

[GitHub Link](#)

- Built a reliable file transfer system over **UDP** using **Stop-and-Wait and Sliding Window ARQ**
- Designed custom packet structures with sequence numbers, checksums, acknowledgements, and retransmission logic
- Simulated an unreliable network with packet loss, corruption, and delays to test protocol robustness under real-world conditions

SKILLS

Programming Languages: Python, C++, C, C#, JavaScript, HTML/CSS, R, MATLAB

Systems/Frameworks/Tools: Git, Linux, Testing, Unity, p5.js, WordPress, VS Code, Xcode, PyCharm, Oculus SDK

Libraries/Technologies: NumPy, pandas, Matplotlib, ZMQ, Socket Programming

Productivity Tools: Microsoft Excel, PowerPoint, Word, Google Workspace, Zoom, Slack, Outlook, Overleaf
